ABOUT

A contemporary sans-serif typeface with an agreeable character, Doctrine is the moderate comrade of the display typeface Doctrine Stencil. From the obscure starting point of the North Korean national airline livery, Doctrine was developed to encompass a series of more mature typographic influences.

Doctrine draws influence from the classic mid-century neo-grotesques and whilst it retains a sense of crisp modernity, it exudes a more contemporary, human character. The rounded, lighter weights speak with graceful composure whilst the large x-height, low contrast and squarer, heavier weights give Doctrine an affable charm and a persuasive voice. The alternate characters borrow elements from humanist and geometric styles and provide an idiosyncratic, experimental counterpart to the primary character set.

Unlike the conventional neo-grotesque model which typically includes an oblique character set, Doctrine features true italics in all of its five weights. Its range of ligatures and figure styles add flair and flexibility to a comprehensive and usable text-face.

Conceptual Background

Barnbrook has long been interested in the link between ideology, language and typography, and it is this concept that inspired the creation of a new typeface. Following an extreme isolationist and authoritarian ideology, North Korea—the world’s last Stalinist state—affords its population little freedom of movement. Considered by many to be a fundamental human right, air travel facilitates freedom of mobility between states. Air Koryo, the state-owned national flag carrier airline of North Korea, therefore appears to be somewhat of an oxymoron. With an unsurprisingly dubious safety record and dismal reviews, Air Koryo is not held in high regard, yet there is something wonderfully naive about its attempt to look like a serious airline. Central to this venture is its rudimentary aircraft livery and branding—often crude in application and at times, even looking hand-painted. Once taking the form of a functional stencil typeface, the logo has now metamorphosed into a modern sans-serif. This peculiar conceptual mix—part political philosophy, part corporate branding—inspired the development of a contemporary, human interpretation of the neo-grotesque model, that most ideological of typographic forms.

Design Information

Escaping beyond the conceptual, political and historical starting points, numerous typographic references have informed the framework of Doctrine. Inspired by mid-twentieth-century modernist idealism but guided by post-modern relativism, Doctrine has evolved into a twenty-first century utopian sans-serif. Pursuit of utopian perfection suggests a purity, or purification—an eradication of extraneous detail—yet, in contrast, the ideology of Doctrine is one of inclusion. The inclusive approach allows a curious blend of modernist, geometric and humanist forms to coalesce in contemporary style.

Established Organisation
Cooperative Transportat
Guaranteed Remunera
Agricultural Production
Speculative Investme

The basic structure of Doctrine was informed by the neo-grotesque model, notably Adrian Frutiger's masterpiece Univers and Max Miedinger's ubiquitous Helvetica—the behemoths of mid-twentieth-century modernism. Yet unlike the aforementioned faces, Doctrine is less clinical and more human in appearance. The rounded, lighter weights speak with graceful composure whilst the large x-height, low contrast and squarer, heavier weights give Doctrine an affable charm and a persuasive voice.

Design Information

A number of characters draw inspiration from Edward Johnston's influential humanist sans-serif for the London underground, adding a pre-modern benevolence to the primary character set and a quirky geometry to the stylistic alternates. Paul Renner's experimental drawings for his visionary Futura provided inspiration for the some of the unusual alternates, as well influencing the more conventional geometric forms.

Adding a playful note to headlines, the alternate capitals drawn on a diverse range of sources. The asymmetric **A** directly references the Air Koryo livery. Informed by the modular widths of geometric typefaces, the **E** and **F** are included with reduced widths. Also influenced by geometrics are the primary **G** and **Q**, their respective alternates are based on the grotesque model, as are the alternate **M** and primary **K**. The unusual **R** includes a concave leg reminiscent of Venetian serif faces whilst the **Y** is based on the Cyrillic character Y.

Design Information

In a nod to typographic history, Doctrine includes a multitude of ligatures. The move away from moveable type saw a steady decline in the typesetting of ligatures. Now, however, contemporary OpenType technology allows for an almost limitless number of glyphs, meaning ligatures can be revived and reconsidered for the twenty-first century, bringing a curious flair to body and headline text setting.

Delving deeper into typographic history, Doctrine features historical forms and alternate characters derived from foreign alphabets. That now unused but well-known historical minuscule, the long s, fell out of use in the early nineteenth century but is revived to work with Doctrine's contemporary forms. Traditionally the long s occurred in the middle or at the beginning of a word—the most famous example being the in the word **congrejs** in the United States Bill of Rights. From the foreign alphabets, the lowercase **e** is inspired by epsilon, the fifth letter of the Greek alphabet and a precursor to the latin e, and the alternate **f** is inspired by the hooked f, the italic form of which, *f*, is used to signify currencies named florin.

Design Information

128–142 High Road,
Ilford, Essex, IG1 1DD

Facilitating distinction between the numeral 1, uppercase I and lowercase l, the primary character set includes a foot serif for the lowercase l, a serified I and an armed figure 1. For a more compact and bold headline, the alternate uppercase I can be used.

SPORTS INITIATION

Doctrine includes four figure styles, two proportional (variable width) styles and two tabular (fixed width). The default figure style is proportional lining—full cap height figures that work best with all-caps settings. Oldstyle figures are designed with ascenders and descenders and have proportions compatible with the lowercase characters for minimal disruption when setting body text. For setting numbers in tables, both lining and old style tabular figures are included.

AVG 16:38
avg 16:38

1	2	3	4	5
1	2	3	4	5

Unlike the conventional neo-grotesque model which normally features an oblique character set, Doctrine includes a full set of true italics. Italics were originally developed by 16th century Venetian printers as a device to save space on the page. Typically true italics are narrow in width unlike oblique characters which are characterised by a slanted angle and regular widths. The standard character set also features characters more typical of true italics: a single story lowercase *a* and a long *f*.

Stylistic Alternates

Doctrine features a series of upper and lowercase stylistic alternates. When using Adobe Illustrator, stylistic alternates are accessed via the OpenType panel by selecting **Stylistic Alternates**. When using Adobe InDesign, stylistic alternates are accessed via the character panel by selecting **OpenType > Stylistic Sets > Set 1**. When using CSS, stylistic alternates are activated using the **font-feature-settings** property with a value of either **salt** or **ss01**.

Ligatures

In addition to standard digraphs such as æ and œ, Doctrine includes a total of 21 ligatures in the standard stylistic set, of which 15 are categorised as **standard** and 7 are categorised as **discretionary**. One ligature in particular is somewhat of an exception: occurring in the Dutch language, the combination of letters I and J are considered a digraph. In Doctrine however, the combination is achieved as an uppercase discretionary ligature—there is no corresponding lowercase ligature. When using Adobe Illustrator, ligatures are accessed via the OpenType panel by selecting **Standard Ligatures** and **Discretionary Ligatures**. When using Adobe InDesign, ligatures are accessed via the character panel by selecting **OpenType > Standard Ligatures** and **OpenType > Discretionary Ligatures**. When using CSS, ligatures are activated using the **font-feature-settings** property with a value of either **liga** or **dlig**.

Proportional Figures

Doctrine includes four figure styles. Proportional figures used for setting numbers in text are available in lining (for all-caps setting) and old-style (for lowercase setting). When using Adobe Illustrator, figure styles are accessed via the OpenType panel by selecting either **Proportional Lining** or **Proportional Oldstyle** from the Figure drop-down menu. When using Adobe InDesign, figure styles are accessed via the character panel by selecting **OpenType > Proportional Lining** or **OpenType > Proportional Oldstyle**. When using CSS, proportional figures are activated using the **font-feature-settings** property with a value of **pnum**.

Standard Character Set | 36 pt Size | 42 pt Leading

The current airline was established in 1954, started operations on 21 September 1955, and was placed under the control of the *Civil Aviation Administration of Korea*. CAAK began operations with ***Lisunov LI2, Antonov AN2*** and ***Ilyushin IL12*** aircraft. ***Ilyushin IL14*** and ***Ilyushin IL18*** turboprops were added to the fleet in the 1960s.

Tabular Figures

Doctrine includes four figure styles. Tabular figures used for setting numbers in tables are available in lining (for all-caps setting) and old-style (for lowercase setting). When using Adobe Illustrator, figure styles are accessed via the OpenType panel by selecting either **Tabular Lining** or **Tabular Oldstyle** from the Figure drop-down menu. When using Adobe InDesign, figure styles are accessed via the character panel by selecting **OpenType > Tabular Lining** or **OpenType > Tabular Oldstyle**. When using CSS, tabular figures are activated using the **font-feature-settings** property with a value of **tnum**.

Citizens of South Korea are normally not permitted to visit North Korea. In addition, there have been reports of difficulties regarding Israeli, American, British, and Japanese nationals. In January 2010, North Korea lifted the restrictions on American citizens who are now free to visit at any time of the year—but they are not allowed to travel by train (especially the train to Beijing) or to participate in homestay-programs (Choson Exchange and The Pyongyang Project are able to bring Americans into the country by train). Contrary to rumour, Israelis and Jewish citizens of other countries do not face any additional restrictions. Citizens of all countries (except Malaysian passport holders entering for 30 days or less for official, business or tour purposes who have already acquired documentation at the DPRK Embassy in Kuala Lumpur showing, North Korean business counterparts or tour and travel agency arrangements) will need a visa, which will only be issued after your tour has been booked, approved by the North Korean authorities and paid for. Journalists (or those suspected of being journalists) require special permission, which

Visiting North Korea can be challenging, and you will not have the freedom to explore the country without a North Korean escort, either as part of a group or individual tour. Citizens of South Korea are normally not permitted to visit North Korea. In addition, there have been reports of difficulties regarding Israeli, American, British, and Japanese nationals. In January 2010, North Korea lifted the restrictions on American citizens who are now free to visit at any time of the year—but they are not allowed to travel by train (especially the train to Beijing) or to participate in homestay programs (Choson Exchange and The Pyongyang Project are able to bring Americans into the country by train). Contrary to rumour, Israelis and Jewish citizens of other countries do not face any additional restrictions. Citizens of all countries (except Malaysian passport holders entering for 30 days or less for official, business or tour purposes who have already acquired documentation at the DPRK Embassy in Kuala Lumpur showing, North Korean business counterparts or tour and travel agency arrangements) will need a visa, which will only be issued after your tour has been booked, approved by the North Korean authorities and paid for. Journalists (or those suspected of being journalists) require special permission, which is quite difficult to obtain. The North Koreans do not allow journalists to visit the country on tourist visas. A specialist North Korean travel agency can help you sort out the complex and ever-changing regulations. North Korea will rarely in practice refuse a visa to a tourist who meets the various requirements. Tourists often arranged a tourist visa through booking a tour with the travel agencies that organise such tours. The travel agencies will usually deal with the visa on their behalf,

Visiting North Korea can be challenging, and you will not have the freedom to explore the country without a North Korean escort, either as part of a group or individual tour. Citizens of South Korea are normally not permitted to visit North Korea. In addition, there have been reports of difficulties regarding Israeli, American, British, and Japanese nationals. In January 2010, North Korea lifted the restrictions on American citizens who are now free to visit at any time of the year—but they are not allowed to travel by train (especially the train to Beijing) or to participate in homestay-programs (Choson Exchange and The Pyongyang Project are able to bring Americans into the country by train). Contrary to rumour, Israelis and Jewish citizens of other countries do not face any additional restrictions. Citizens of all countries (except Malaysian passport holders entering for 30 days or less for official, business or tour purposes who have already acquired documentation at the DPRK Embassy in Kuala Lumpur showing, North Korean business counterparts or tour and travel agency arrangements) will need a visa, which will only be issued after your tour has been booked, approved by the North Korean authorities and paid for. Journalists (or those suspected of being journalists) require special permission, which is quite difficult to obtain. The North Koreans do not allow journalists to visit the country on tourist visas. A specialist North Korean travel agency can help you sort out the complex and ever-changing regulations.

North Korea warns safety of British diplomats ‘cannot be guaranteed’

British diplomats in North Korea have been warned the government there cannot guarantee their safety after April 10 in the event of conflict, the Foreign Office has said.

The latest move comes amid spiralling tensions in the Korean peninsula. ¶ The Foreign Office says it is “**considering next steps**” after the North Korean regime asked if Britain is considering evacuating its embassy. ¶ On Thursday, David Cameron said he was “**very concerned**” about North Korea. ¶ The UK prime minister cited the nuclear threat posed by the regime led by Kim Jong-un as one of the reasons he is committed to maintaining a round the clock submarine-based nuclear missile system. ¶ As a result of the latest development, the Foreign Office says it is “**considering next steps**”, including the possibility of amending travel advice. ¶ But it warned North Korea that it had obligations under the international Vienna convention to protect diplomatic missions and claimed the move was an example of the “**continuing rhetoric**” against the United States. ¶ Anecdotal reports from inside the North Korean capital, Pyongyang, say the mood there is calm, and many believe North Korea is deliberately trying to create a sense of crisis, says the BBC's Lucy Williamson in Seoul.

NORTH KOREA occupies the northern portion of the Korean Peninsula, lying between latitudes 37° and 43°N, and longitudes 124° and 131°E. It covers an area of 120,540 square kilometres (46,541 sq mi). *North Korea* shares land borders with *China* and *Russia* to the north, and borders *South Korea* along the Korean Demilitarized Zone. To its west are the Yellow Sea and Korea Bay, and to its east lies *Japan* across the Sea of *Japan* (East Sea of *Korea*). The highest point in *North Korea* is Baekdu Mountain at 2,744 metres (9,003 ft). The longest river is the Amnok River which flows for 790 kilometres (491 mi).

THE CAPITAL and largest city is *Pyongyang*; other major cities include *Kaesong* in the south, *Sinuiju* in the northwest, *Wonsan* and *Hamhung* in the east and *Chongjin* in the northeast. In 2013, internet users were encouraged to participate in a community based event on Google Maps. These users could use Google Map Maker along with Cartography and Telemetry skills that eventually led to a virtual map of *Pyongyang*. In addition, the Google Map of *North Korea* includes political prison camp locations such as Camp 22.

NORTH KOREA 2008 CENSUS

LARGEST CITIES AND TOWNS

RANK	CITY NAME	ADMINISTRATIVE DIVISION*	POPULATION
01	Pyongyang	<i>Pyongyang Capital City</i>	3 255 288
02	Hamhung	<i>South Hamgyong Province</i>	0 768 288
03	Chongjin	<i>North Hamgyong Province</i>	0 667 929
04	Nampho	<i>South Pyongan Province</i>	0 366 815
05	Wonsan	<i>Kangwon Province</i>	0 363 127
06	Sinuiju	<i>North Pyongan Province</i>	0 359 341
07	Tanchon	<i>South Hamgyong Province</i>	0 345 875
08	Kaechon	<i>South Pyongan Province</i>	0 319 554
09	Kaesong	<i>North Hwanghae Province</i>	0 308 440
10	Sariwon	<i>North Hwanghae Province</i>	0 307 764

The administrative divisions of North Korea are organized into three hierarchical levels. Many of the units have equivalents in the system of South Korea. At the highest level are nine provinces, two directly governed cities, and three special administrative divisions. The second-level divisions are cities, counties, wards, and districts. These are further subdivided into third-level entities: towns, neighborhoods, villages, and workers' districts.

The three-level administrative system used in North Korea was first inaugurated by Kim Il-sung in 1952, as part of a massive restructuring of local government. Previously, the country had used a multi-level system similar to that still used in South Korea.

The English translations are not official, but approximations. Names are romanized according to the McCune-Reischauer system as officially used in North Korea; the editor was also guided by the spellings used on the 2003 National Geographic map of Korea.

Korean ***romanization*** is a system for representing the ***Korean language*** using the ***Latin script***. ***Korean*** also has an alphabetic script of its own called ***Hangul***, and is sometimes written using Chinese-style characters called ***Hanja***.

wall (byeok) on the wall (byeoge) outside (bakke) kitchen (bueoke) wikipedia (wikibaekgwa) hangul (hangeul) character, letter (geulja) korea has four distinct seasons (hangugeun ne gyejeori tturyeothada) just check the line color and width you want (wonhasineun seon saekkkalgwa gulk-gie chekeuhasimyeon doemnida)

Romaja literally means Roman letters in Korean, and refers to the Latin script. “Romaja” is not to be confused with “romanization”. The former can be applied to any use of the Latin script in Korean text—whether for Korean or non-Korean words or names—while the latter refers to writing Korean words using the Latin script: either romanizing individual words in a Korean text, or writing an entire Korean text in the Latin script.

T
