

Capitolium 2

A modern serif with strong links to tradition. Sturdier shapes and more characters per line of text.

DESIGNED BY

Gerard Unger

YEAR

2011

Capitolium was designed by Dr Gerard Unger in 1998 at the request of the Agenzia Romana per la Preparazione del Giubileo for the Jubilee of the Roman Catholic Church in 2000. This type design was the central part of the project for a wayfinding and information system to guide pilgrims and tourists through Rome. Capitolium also continued Rome's almost uninterrupted 2,000 year old tradition of public lettering. It is a modern typeface for the 21st century that is strongly related to the traditions of Rome.

Soon after the completion of this project, Dr Unger began contemplating the possibility of bringing this design to newspapers. Though the original Capitolium worked well in most modern production processes and on screens, its original wayfinding purpose meant it was too fragile for the more stringent requirements of newsprint: sturdier shapes, a taller x-height, and more characters per line of text.

The answer to these design parameters was Capitolium 2, a three-series newsface with classic letterforms springing from Rome's long and robust type tradition.

This elegant type family, composed of Capitolium 2, Capitolium News 2, and Capitolium 2 Headline, includes the addition of over 350 glyphs per weight for full Latin A language support, small caps, new ligatures, four sets of numerals, arbitrary fractions, and superiors and inferiors. Furthermore, kerning was fine-tuned for better text performance.

The primary differences between Capitolium 2 and Capitolium News 2 is their x-height, serif sharpness, letter tracking, and available styles.

Capitolium Headline 2 is the titling companion to this editorial type family, beautifully engineered for large sizes and compact setting. Its increased x-height, combined with narrower lettershapes and the Capitolium family's naturally high stroke contrast, allow for finesse within striking multi-line headline.

The complete Capitolium 2 family comes in 18 styles (five in Capitolium 2, six in Capitolium News 2, and eight in Capitolium Headline 2), speaks multiple languages, and, along with our entire catalogue, has been optimised for today's varied screen uses.

Vědecký obor zabývající se zkoumáním jazyka se nazývá lingvistika. Otázky týkající se filosofie jazyka byly pokládány již ve starověkém Řecku, byly zde otázky typu zda mohou slova reprezentovat zkušenosť nebo motivovanost obsahu slov, konkrétními památkami jsou například Platónovy dialogy Gorgias a Faidros. Ještě časnějším dokladem uvažování o jazyku jsou gramatiky sanskrtu, nejranější záznamy o kodifikaci liturgického jazyka a

Il linguaggio, in linguistica, è il complesso definito di suoni, gesti e movimenti attraverso il quale si attiva un processo di comunicazione. La capacità di elaborare e produrre un linguaggio verbale, nell'uomo, si è sviluppata a seguito di mutamenti strutturali della cavità orale. Język służy do przedstawiania rzeczywistości dotyczącej przedmiotów, czynności czy abstrakcyjnych pojęć za pomocą znaków. Zbiór znaków w języku jest otwarty. Wynika to z faktu, że znakiem językowym jest każdy tekst, każda sformułowana wypowiedź, posiadająca znaczenie. Jednostka posługująca się językiem może więc za pomocą jego systemu tworzyć nieskończoną liczbę nowych znaków, także takich, z którymi nigdy się wcześniej nie zetknęła.

As might have been foreseen, Franconia proved to be an excellent place in which to study the difficult family of *flycatchers*. All our common eastern Massachusetts species were present — the *kingbird*, the *phoebe*, the *wood pewee*, and the *least flycatcher* — and with them the *crested flycatcher* (not common), the *olive-sided*, the *traill*, and the *yellow-bellied*. The *phoebe-like* cry of the *traill* was to be heard constantly

Les gestes sont la méthode de communication la plus connue, utilisée par diverses espèces dont l'ensemble des primates. C'est également le cas des abeilles et leurs danses: lorsqu'une abeille exploratrice revient vers sa ruche après avoir trouvé une source de nectar, elle peut effectuer une danse en rond indiquant que cette source se situe à moins de 50 mètres, ou une danse en huit indiquant que cette source est plus lointaine. De plus, la vitesse et la durée de ces danses

Vědecký obor zabývající se zkoumáním jazyka se nazývá lingvistika. Otázky týkající se filosofie jazyka byly pokládány již ve starověkém Řecku, byly zde otázky typu zda mohou slova reprezentovat zkušenost nebo motivovanost obsahu slov, konkrétními památkami jsou například Platónovy dialogy Gorgias a Faidros. Ještě časnějším dokladem uvažování o jazyku jsou gramatiky sanskrtu, nejrannější záznamy o kodifikaci liturgického jazyka a uspořádání znaků do abecedy

Il linguaggio, in linguistica, è il complesso definito di suoni, gesti e movimenti attraverso il quale si attiva un processo di comunicazione. La facoltà di rappresentare mentalmente un significato è presente in molte specie di animali, tra le quali l'essere umano. La capacità di elaborare e produrre un linguaggio verbale, nell'uomo, si è sviluppata a seguito di mutamenti strutturali della cavità orale. In particolare l'arretramento dell'ugola ha reso l'essere umano capace di esprime-

Język służy do przedstawiania rzeczywistości dotyczącej przedmiotów, czynności czy abstrakcyjnych pojęć za pomocą znaków. Zbiór znaków w języku jest otwarty. Wynika to z faktu, że znakiem językowym jest każdy tekst, każda sformułowana wypowiedź, posiadająca znaczenie. Jednostka posługująca się językiem może więc za pomocą jego systemu tworzyć nieskończoną liczbę nowych znaków, także takich, z którymi nigdy się wcześniej nie zetknęła. Znaki te

THE DESIGNERS

Dr Gerard Unger (1942-2020) was born in The Netherlands. He studied graphic design, typography, and type design from 1963-67 at the Gerrit Rietveld Academy, Amsterdam. He was Professor of Typography at Leiden University, the Netherlands from 2006-2012, from which he also received his PhD in 2013.

Dr Unger has worked as a freelance designer since 1972 and currently teaches as visiting professor at The University of Reading, UK, Department of Typography and Graphic Communication. He has designed stamps, coins, magazines, newspapers, books, logos, corporate identities, annual reports, and many other objects, as well as many typefaces.

Dr Unger has been awarded several Dutch and international prizes and honours, such as two honorary doctorates by the universities of Hasselt, Belgium and Tallinn, Estonia. He has written articles for the trade press, and several larger publications, such as *Landscape with Letters* (1989), linking the usually limited scope of type and typography with a wider cultural view. His book *Terwijl je leest — While You Are Reading* — has been translated into Italian, English, Spanish, German, French, Korean, and Portuguese. He lectures frequently in Holland and abroad about his own work, type design, the reading process, and related subjects.

Dr Unger's typefaces published with TypeTogether include Alverata, Capitolium 2, Coranto 2, and Sanserata.
