

Liebe Heide

a novel color font
that creates natural
ballpoint pen writings

Achtung: new font technology

- LiebetHeide is a color font based on bitmap images
- the color of the font cannot be changed in text editors, but adjusted with Photoshop filters
- only supported by Adobe's Creative Cloud apps (not Creative Suite) and all native MacOS apps
- works best on light backgrounds (set layer effect to "Darken" when background is not white)
- limited scalability: when printed with x-height larger than 5cm it might start getting blurry

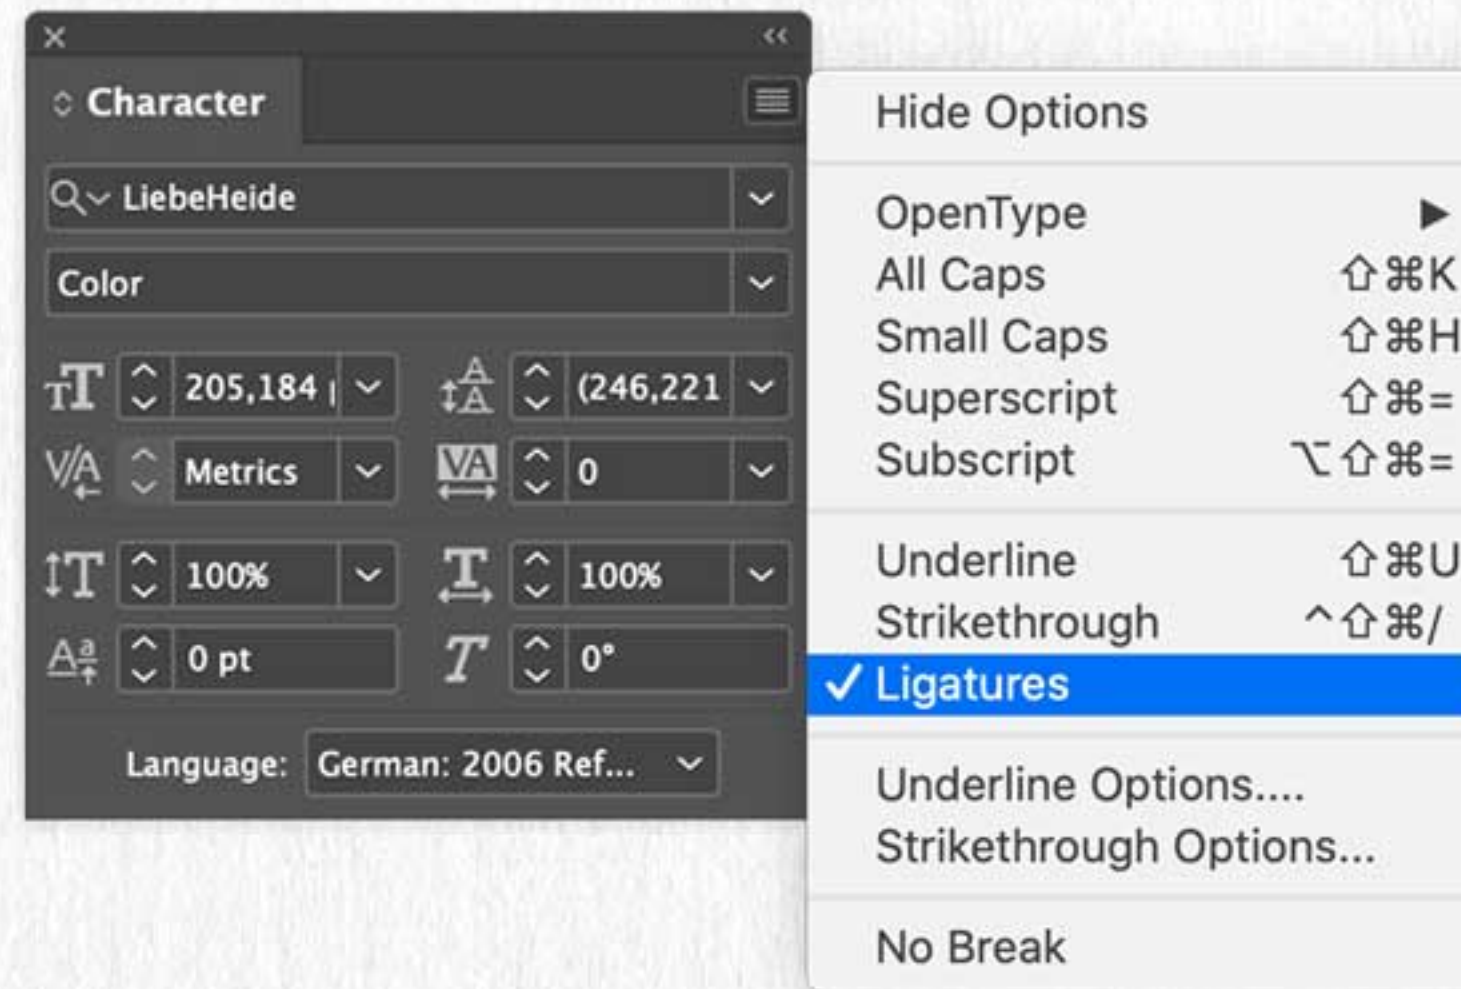

intelligent replacement mechanism
for an authentic handwritten look

Lots of fun extras included

:-) ☺
:-(☹
:-D 😄
;-) 😊
