

OTC Hitomi34 is a condensed monospaced geometric grotesque (for the better part of 90%, the remaining characters will go by as duospace font); a mouthful, with wood type and sign painting, industrial roots.

I guess you could just call it duospace from the beginning and deal with it.

Style: condensed duospace, with slanted & back slanted versions. It features stylistic alternates and has language support for: Basic Latin, Western, Central & Eastern European Languages.
