

Guapa

Author	Laura Meseguer
Creation	2012
Version	1.5
1 style	Regular
Character Sets	Basic Latin Latin-1 Supplement
License Types	Desktop, Webfont, ePub, App, Server

Guapa was first born from a personal experiment: transforming a geometric sans serif “à la Futura” into a charming postmodern deco design. Laura began to work in Guapa on the occasion of the exhibition *Pimp the type* that was organized by Catalana de Tipos, in which 52 designers showed their vision of how the tuning of letters can add personality and originality to the message or the alphabetical forms. It became a well-suited typeface for the word: from titles for magazines to book & record covers and packaging. Guapa is provided with discretionary ligatures, alternative characters, Initials and Swash Capitals.

Guapa is fancy, delicious & fresh!

Open Type formats allow to include an expanded character set and layout features, to provide advanced typographic control and better linguistic support such as ligatures, alternates characters and contextual substitutions. Open Type fonts work in all applications but only some take profit of the features.

OT supports Unicode which enables the fonts to contain more than 65,000 glyphs, while PostScript area limited to a maximum of only 256 characters.

Open Type fonts work in all platforms and operative systems, having one single file for Mac and PC makes sharing files much more easier.
