Legibility is primarily the concern of the typeface designer, to ensure that each individual character or glyph is unambiguous and distinguishable from all other characters in the font. Legibility is also in part the concern of the typographer to select a typeface with appropriate clarity of design for the intended use at the intended size. An example of a well-known design, Brush Script, contains a number of illegible letters since many of the characters can be easily misread especially if seen out of textual context. Readability is primarily the concern of the typographer or information designer. It is the intended result of the complete process of presentation of textual material in order to communicate meaning as unambiguously as possible. A reader should be assisted in navigating around the information with ease, by optimal inter-letter, inter-word and particularly inter-line spacing, coupled with appropriate line length and position on the page, careful editorial chunking and choice of the text general architecture of titles, folios, and reference links. Progressiva Thin

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva ExtraLight

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva Light

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva Book

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva Regular

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva Medium

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva SemiBold

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva Bold

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, corporate material, etc.

Progressiva ExtraBold

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, etc.

Progressiva Black

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, etc.

Progressiva UltraBlack

Progressiva is a sans serif family for text and display usage. With some unique playful forms and a little bit condensed structure, the family is ideal for texts that require some personality and titles with great visual presence. It's suitable for magazines, posters, packaging, advertising, signage, etc.

Sample text in English

When writing systems were invented in ancient civilizations, nearly everything that could be written upon – stone, clay, tree bark, metal sheets – was used for writing. The study of such inscriptions forms a major part of history. Alphabetic writing emerged in Egypt about 5,000 years ago. The Ancient Egyptians would often write on papyrus, a plant grown along the Nile River. At first the words were not separated from each other (scriptural continua) and there was no punctuation. Texts were written from right to left, left to right, and even so that alternate lines read in opposite directions. The technical term for this type of writing is boustrophedon, which means literally ‘ox-turning’ for the way a farmer drives an ox to plough his fields. Papyrus, a thick paper-like material made by weaving the stems of the papyrus plant, then pounding the woven sheet with a hammer-like tool, was used for writing in Ancient Egypt, perhaps as early as the First Dynasty, although the first evidence is from the account books of King Nefertiti Kakai of the Fifth Dynasty (about 2400 BC). Papyrus sheets were glued together to form a scroll. Tree bark such as lime and other materials were also used. According to Herodotus, the Phoenicians brought writing and papyrus to Greece around the 10th or 9th century BC. The Greek word for papyrus as writing material (biblion) and book (biblos) come from the Phoenician port town Byblos, through which papyrus was exported to Greece. From Greek we also derive the word tome, which originally meant a slice or piece and from there began to denote “a roll of papyrus”.

Sample text in French

Le livre est défini par Littré comme une « réunion de plusieurs feuilles servant de support à un texte manuscrit ou imprimé ». Dans son Nouveau Dictionnaire universel (édition de 1870), Maurice Lachâtre le définit comme un « assemblage de plusieurs feuilles de papier, de vélin, de parchemin, imprimées ou écrites à la main cousues ensemble et formant un volume recouvert d'une feuille de papier, de carton, de parchemin, de basane, de veau, de maroquin, etc ». Le livre est un objet technique prolongeant les capacités humaines de communication au-delà de l'espace et du temps. Il permet de transmettre du sens selon une forme matérielle particulière. C'est un volume de pages reliées, présentant un ou des textes sous une page de titre commune. Les techniques de fabrication utilisées conduisent à en fixer définitivement le contenu. Sa forme induit une organisation linéaire (pagination, chapitres, etc.). Il comporte également des outils d'accès « synchroniques » (index, sommaire). Il existe un grand nombre de livres selon le genre, la structuration intellectuelle, les destinataires, selon le mode de fabrication et les formats, selon les usages. Œuvre de l'esprit conçue par un auteur, un livre est publié – sauf exception, tel le livre d'artiste – en multiple par un éditeur, comme en témoignent les éléments d'identification qu'il comporte obligatoirement. Interface entre un lecteur et un auteur, c'est un objet culturel lié à l'histoire occidentale. Une description matérielle du livre peut permettre de retenir les trois fonctions suivantes: support de l'écriture, diffusion et conservation de textes de nature variée.

Sample text in German

Ein Buch (auch Kodex) ist eine mit einer Bindung und meistens auch mit Bucheinband (Umschlag) versehene Sammlung von bedruckten, beschriebenen, bemalten oder auch leeren Blättern aus Papier oder anderen geeigneten Materialien. Laut Unesco-Definition sind (für Statistiken) Bücher nichtperiodische Publikationen mit einem Umfang von 49 Seiten oder mehr. Die Unesco legte 1995 den 23. April als Welttag des Buches fest. Zudem werden einzelne Werke oder große Textabschnitte, die in sich abgeschlossen sind, als Buch bezeichnet, insbesondere wenn sie Teil eines Bandes sind. Das ist vor allem bei antiken Werken, die aus zusammengehörigen Büchersammlungen bestehen, der Fall – Beispiele hierfür sind die Bibel und andere normative religiöse Heilige Schriften, die Aeneis sowie diverse antike und mittelalterliche Geschichtswerke. Elektronisch gespeicherte Buchtexte nennt man digitale Bücher (englisch e-book). Eine andere moderne Variante des Buches ist das Hörbuch. Der Begriff Buch leitet sich vom Namen der Baumart Buche ab, wohl wegen der in Buchenblöcke eingeritzten „Buchstaben“. Auch das lateinische Wort „Codex“ bedeutet „Block“. Der Produktlebenszyklus ist ungewöhnlich lang. Diese Besonderheiten machen das Buch zu einem spekulativen Wirtschaftsgut mit hohen Risiken für den Produzenten (Verleger). Im Unterschied zu anderen Medienprodukten finanziert sich das Buch in der Regel nur über eine Erlösquelle, den Vertriebsverlös. Als Werbeträger spielt das Buch nur eine untergeordnete Rolle.

Sample text in Portuguese

Na Antiguidade surge a escrita, anteriormente ao texto e ao livro como conhecemos. A escrita consiste de código capaz de transmitir e conservar noções abstratas ou valores concretos, em resumo: palavras. É importante destacar aqui que o meio condiciona o signo, ou seja, a escrita foi em certo sentido orientada por esse tipo de suporte; não se esculpe em papel ou se escreve no mármore. Os primeiros suportes utilizados para a escrita foram tabuletas de argila ou de pedra. A seguir veio o khartés (volumen para os romanos, forma pela qual ficou mais conhecido), que consistia em um cilindro de papiro, facilmente transportado. O “volumen” era desenrolado conforme ia sendo lido, e o texto era escrito em colunas na maioria das vezes (e não no sentido do eixo cilíndrico, como se acredita). Algumas vezes um mesmo cilindro continha várias obras, sendo chamado então de tomo. O comprimento total de um “volumen” era de 6 ou 7 metros, e quando enrolado seu diâmetro chegava a 6 centímetros. O papiro consiste em uma parte da planta, que era liberada, livrada (latim libere, livre) do restante da planta – daí surge a palavra liber libri, em latim, e posteriormente livro em português. Os fragmentos de papilos mais “recentes” são datados do século II a.C. Aos poucos o papiro é substituído pelo pergaminho. A vantagem do pergaminho é que ele se conserva mais ao longo do tempo. O nome pergaminho deriva de Pérgamo, cidade da Ásia menor onde teria sido inventado e onde era muito usado. O “volumen” também foi substituído pelo códex, que era uma compilação de páginas, não mais um rolo.
